

*Assignment –3*  
**Overview of SQL.**

1) Does ANSI recognize the data type DATE?

Ans. Yes, the ANSI SQL standard recognizes the DATE data type. It is used to store date values in the format YYYY-MM-DD, representing year, month, and day.

2) Which subdivision of SQL is used to insert values in tables?

Ans. The subdivision of SQL used to insert values into tables is the Data Manipulation Language (DML). The INSERT statement, which is part of DML, is used to add new records (rows) into a table.
